# A BATTLE WITH A BOY.

Ulysses Nelson, a 15-Year-Old Robber, Holds a Posse of Police and Sheriffs at Bay.

He Fatally Shoots an Officer Who Tries to Arrest Him and Steals a Horse from One of His Pursuers,

Finally He Is Surrounded in a Corn-Field, and After a Desperate Resistance Surrenders.

OMAHA, Neb., Aug. 5.—When the east-bound Burlington train reached Hastings this morning at 1 o'clock Depot Policeman Balcombe inquired of the conductor for a passenger named Ulyses Nelson, alias George Williams, aged only 15, who was wanted for robbery at Holdrege. The conductor pointed the boy out and told Balcombe that the little fellow was armed with a big revolver and that it would be best to be careful. Policeman Balcombe approached the boy on the depot platform and asked

him what he was doing.

"Nothing much," was the response.

Thereupon the officer flashed a dark lan-Thereupon the officer flashed a dark lantern upon the youth, who, without warning, fired at him. The bullet struck Balcombe two inches below the heart. Balcombe, nevertheless, followed the young desperado for two blocks and then fell exhausted.

Meanwhile the police department was notified and the members, with Sheriff Barloss, mounted horses and stated in pressit.

No clew of Nelson was found until 6 o'clock this morning, when he was found hiding in some weeds in the southern outskirts. was ordered to throw up his hands by Sheriff Barloss, but showing no disposition to surrender the sheriff ordered the party to open fire on him.

Twenty shots were fired without effect. Officer Mitchell then crawled through the grass to within a few feet of Nelson when both opened fire at each other. Nelson received a bullet in the left cheek. Mitchell's ammunition failing, as well as that of the other officers, he withdrew.

Nelson skyly crawled to the fence and mounting one of the officers horses which had been tied there be rode off, closely followed by one of the posse named Clark, who was unarmed. Clark kept at a safe distance, but kept track of Nelson.

The other officers obtained a fresh supply of ammunition and resumed the pursuit. When within one mile of Ayr, eleven miles south of Hastings, Nelson went into a cornited and hid. Men from Ayr who had been notified started out with shotguns and met notified started ouf with shotguns and met Clark, who gave them a clew to Nelson's hiding place. Clark took a shotgun and entered the field, the corn being botween ten and twelve feet high, feeting within range Clark fired a load of buck-shot at Nelson who. Indian fashion, leaned over on the side of the horse and avoided the charge of shot. Nelson then fired at Clark, slightly wounding him in the right hand. Nelson's pursuers now closed in on him, and he finally surrendered and was taken back to Hastings.

closed in on him, and he finally surrendered and was taken back to Hastings.

Little hope is entertained for the recovery of Policeman Balcombe. Nelson's father resides at Indianapolis, and his mother lives at Topeka, where the boy was raised. He has been serving as cook on the Atlantic and Pacific for the past year. Nelson offices the situation very coofly. His desperate course is greatly wondered at should fateonine due to night Nelson will be lynched. The jail is surrounded by a special guard and great excitement prevails.

Mr. Parnell says: "The publication of the scheme will fully establish the entire consistency of my public and private declarations on the subject. Let thim print the alleged coercion act, with the alterations in my hand in brackets."

Mr. Parnell write angues that it was only Chamberlain's illegitimate extension of the bublin council scheme for merely administrative purposes which he favored-in 1882, and that he has since denounced it., He says: "Such a scheme would have been a suitable achievement for our small party of thirty-five, but the return of eighty-six Irish members and Lord Carnarvon's declaration to me in favor of an Irish parliament rendered the consideration of Irish autonomy indispensable, and I laid down this position at the Imperial hotel dinner in the autum of 1885. Our view in 1882, from which we never departed, was that the functions of the proposed council should be purely administrative, and that it should not be accepted in the slightest degree as a substitute for the parliament which Mr. Chamberlain proposed. Nothing ever heretotore printed in THE TIMES has provoked more comment or at-tracted more widespread attention than the tracted more widespread attention than the exposures made during the last six days of the condition of the girls who work in some of the sewing shops of the city. The entire public seems to be watching the progress of the revelations made by Miss Nelson not only with interest but with constantly increasing indignation at the slave-drivers who are responsible for the state of affairs. Hundreds of etters are received at this office daily commending the work and progras the Hundreds of setters are received at this office daily commending the work and urging that it be prosecuted until the public is so thoroughly aroused that the evil shall be specify and permanently corrected. Several of the writers have sent sums of money varying from \$1 to \$25 requesting that Miss Nelson distribute it among the poor girls who are so bitterly and shamefully oppressed, or make such use of it as her good judgment and experience may sugarst. Coming unsolicited, as these contributions do, they show that the public is getting to be not only in earnest but thoroughly in earnest about the matter.

"But suppose they become expert?"

"In such a case," Mr. Batdorf replied, "we eat the price of the work down." Subsequently he exhibited the following, with a degree of gusto, but it was some time before he would allow it to be copied:

TO THE TAYLOR PRESENT OF THE TOTAL INTERNATIONAL WE.

been drawn up by George Hamilton, secre-tary of the company, and after the articles in The Times had been read to the girls, it was read and they were asked to sign it, which they did without exception, that is, the names of about seventy were attached to the paper, but in several instances the handwriting was so similar as terraise a suspicion about it. This was settled by several of the girls being sent for and by their saying they had authorized the signing of their names When asked if they knew what they had signed one of them said it meant she had nothing to kick about or against the firm.

Touching some of the minor charges or allegations, by The Times—in fact, all of them—it was found that they were abundantly suspaine | by the facts. That the girls were paying for their ice-water, at the rate of 2 cents a week, was not denied. In fact, the barrel was so labeled, but the explanation was that while one of the members of firm was sick recently the girls had starfed the ice-buying, which the firm had formerly done, and it had been kept up ever since.

The allegation that the girls were com-pelled to pay rent for the machines used was denied, but the books showed differently. The firm's explanation was that the 12 cents a week was charged for needles, the object being to prevent the girls from using blunt mes and thus spoiling goods. showed however, that the pay-roll had an item at the bottom of it which read: "Machine rent. > 10.55."

J. W. Batdorf was very angry about The Times' article and even went so far TIMES article and even went so far as to say that he knew the lady reporter of THE TIMES, and that he would insuit her whenever he met her, and would be tempted to slap her in the face. He furthermore said she was "no lady," and that he should not only make THE TIMES pay for what it had published, but he would have the lady arrested for "malicious perse-ention." C. S. Batdorf added in the converention." C. S. Batdorf added in the conver-sation that what hurt him most was that he was in society and a member of the La Salle club, and the publication made him ashamed. But even worse than this, he said, was the fact that his landlady was looking down on him on account of the af-fair, and the people where he boarded were earling he lived us he did by granding the saying he lived as he did by grinding the working girls down.

Wetherell's.

The proprietors of Wetherell's establishment claim that a number of mistakes were made in regard to the prices they pay for fork. It will be remembered that Miss Nelson did not succeed in securing employment with this concern, and that she got informa-tion about it only from one of the employes. The firm exhibited their books to show that the girls get 7 cents a gross for sewing on buckles instead of 4 cents, as reported, and that they make all the way from \$3.50 to \$6 a week. For cutting wire they pay i cent a gross, and one of the girls testified that she cut from seventy-five to ninety gross a day, and the books showed that she never earned less than \$3.50 a week when working full time. For springing and basting bustles the shop seems to be paying \$5 to \$6 a week. For putting elastics on reeds, which was the takan ordinary small rubber band and putting it around several pieces to keep them together, the price is ten cents a gross, and the wages earned are from \$4 to \$6 a week. The petit cash book was displayed, but no evidence was seen of a \$14 cloak having been sold any employe. It was claimed that such an entry would certainly have been made upon that book. It recorded numerous items of merchand'se sold the girls. Mr. Stein claimed that it was only done for an accommodation and entailed much work. He claimed employes drew money every Saturday, and at any other time, and it was kind-ness in him to, allow it. Neverthless Miss

Nelson had a lively time getting hers.

In all the places visited by the "honest re porter evidence was found that the poor work girls have already begun to benefit in some slight way at least from the exposures made in their interest. A fan was working at Stein's, water-closets and toilet-rooms were clean, and everything had evidently been freshly brightened up. At the Never-Rip things had also been put to rights and the place was looking cheerful.

The Girls Themselve, to Blante.

JOLLET, Ill., Aug. 4. To the EDITOR: While commenting the clory of THE TIMES to better the combition of Chicago working girls and concoding that your work is a most praiseworthy and hen voicit one, still, I can not help feeling that the girls themselves are largely to blance for the condition of advirs. They will go and work for the brutes who run the clock and underwear factories, bad not only that, but when one leaves there are ten ready to fill her place, eager to get the pittance pand them and to work their lives out rather than do lousework.

These girls say that housework is degrading. Can it be possible that in any house—any house among the thousands where good domestics are at a premium—there exists a more degrading condition of affairs than that related by Miss Nelson as existing at Julius Stefu & Co.'s? They argue that housework is deudery. What then is work in the room described, by Miss Nelson in

Nelson as existing at Julius Stein & Co. 52. They argue that housework is drudgery. What then is work in the room described, by Miss Nelson in Friday's Times? The girls then say that housework deprives them of their independence. Let us see. A good girl—and Issum-, very many, noor ones—get on an average 83 per week doing housework. Let us see what they really get. They have good board and lodging worth—for it is far better than that of the second and third class boarding-houses—say, \$4.50 per week. That affiled to the \$3 cash amounts to \$7.50 per week, or about \$30 to \$32 per month. Of this \$13 is clear eash. Site has a roof over her head and doesn't have to go from one to six miles to her work. And have to go from one to six miles to her work. And

have to go from one to six miles to her work. And yet she complains that such a life is slavery!

And yet the Never-Rip Jersey company and Julius Stein & Co. find no lack of employes—life, and the such a stein and to get their employers would be more considerate, but they will accept anything. Can you lay all the blame upon the employers? Lead the girls to seek other findoyments, and those and other firms will be obliged to offer some inducements to get employes. The root of the evil lies in the readines of the girls to work for little or nothing in these holes.

Here in Watseka the servant-girk is a lady; she receives good wages, has her Thursday afternoon's out and her rest on Sunday after meals, just as any menher of the family has. Yet servant-girls are caree here. Why will not these poor girls of the crowded cities go to the country, where they him breathe the fresh air instead of being confined to dingy, stifling lofts or damp, dark cellars? Here are humane people and good pay; here they will be regarded as human beings and life will be worth living. Degrading Female Labor,

Degrading Female Labor.

—THE CHICAGO TIMES has been gathering a mass of facts tending to show the utter heartlessness of certain employers of female labor engaged in the production of goods for women's wear. The "stoff throughout is,a very sickening one. Girls of tender years and young women of delicate health are subjected to the most exacting duties and paid the most pinching and meager wages. Work that wearies the brain, exhausts the nerves, and wears out the body—work that is accepted as the only means for keeping soul and body together—is exacted of these needy and half-starved creatures, who can barely earn enough to sustain life. The insolence and petty annoyanees to which these girls are subjected, to say nothing of the petty lareenies perpetrated upon them by a system of "docking," stamp their employers as greedy, heartless, and cruel taskmasters.

What Miss Nelson's Reports Are Worth.

What Miss Nelson's Reports Are Worth, THE CHICAGO TIMES is conducting a very interesting inquiry into the wages and treatment of female employes in city factories. It is made evident that the wages of girls in sewing-rooms in Chieago average about \$3.2 week for ten hours' work & day. Yet the political statisticians, the people who prate about the pauper labor of Enrope and the well-paid labor of the United States, would doubtless plunge into the industrial mactorion of Chieago and emerge with bold associations that wages average from \$8 to \$12 weekly. Such independent investigations as that being made by THE TIMES are worth more than the reports of the most diguided congressional committee.—Kansas City News.

"White Slaves" in America.

THE CHICAGO TIMES has recently been publishing a series of sensational articles on "The White Slaves of Chicago." Its investigations have Whate Slaves of Chicago." Its investigations have so far been confined mainly to the sewing girls and a terrible condition of affairs is revealed. At one factory one seeing girl received of epits for three days, work. Lots of the girls did not average over 5 or 2 cents a day. One of the observand most skilled workers had only \$5.10 coming to her for two weeks work. The treatment of the girls was tyrafineal in the extreme. They were scouled, fixed, and browbeaten without mercy, and their priy held back until often they were on scolded, fixed, and browheaten without mercy, and their pay held back until often they were on the verge of starvation. At another cloak factory it was even worse. As the writer of the article, "Neff Nelson," expresses it, "thor there is bondage, the laborer a slave, and flesh and blood cheaper than needles and thread," She found there one young girl who was making fringe, working nine and one-half hours a day, for an accuracy of their factors. working nine and one-half hours a day, for an average of about 1624 cents. "Another girl said: "I in here since May, but I don't like it; the boss is a horrid thing. Him and the forelady watches as all the time, and they don't give us hardly any work. I can only make one cloak a day, some pays 30 cents, some 40 cents, and some 50 cents. Vesterday I had only 60 cents coming to me for two days. They search your bag and your pocket when you contours northy to see II you have any when you go home nights to see if you have any thread or pieces about you."

Can the records of the "pauper labor of Europe" show sadder instances of ill-paid toil, abject powerty, and helpiess suffering than is recorded in these Cheago exposures?

And yet the American workingmen and women are "protected" by a tariff aggregating 4 per cent,

THE CHICAGO TIMES has been publishing a series of articles from the pen of Nell Nelson on city slave gits, being an exposition of the cruel, heartless manner in which sewing girls in the city are treated and cheated. It is the sad story of real life as it is among the poor, but honest, strungling for an existence in our overcrowded cities. We in the country can form no conception of the brutal manner in which modest, honest, industrious working girls (or boys, too, for that matter are treated in the great cities where all is murry and hurly-burly and the weak and helpless are scarcely seen or else trodden under foot by the rushing crowd who see nothing but the all

THE UNSIGNED SIOUX TREATY. Symptoms of Defection Among the Indians Give the Commissioners Hope,

STANDING ROCK, Dakota, Aug. 5.—The Indians are remaining in camp and are anxiously awaiting tomorrow when they will get their rations. The conference adjourned until tomorrow at 9 o'clock, and a lively session is expected. The first expression of the Indians since the commissioners accused their chiefs of intimulation will be given, and their speeches are awaited with a view. and their speeches are awaited with anxiety. There is no apparent change in the sertiment of the chiefs, who still assert that they will never ac-

the chiefs, who still assert that they will never accept the treaty, but it is believed by the commissioners and others that a break will be made by at least one-half of the Indians.

The power of the chiefs has been greatly decreased by Agent McLaughlin, who during the last few years has given the humblest Indian to understand that he is as good as the highest chief or medicine man. The visit of Sitting Bull to the commission has increased the hope of success, for if he was sincere in what he said he is much more friendly than was hoped for. It is understood that tomorrow the commissioners will call upon the influential half-breeds and friendly Indians to sign first, and if these sign some believe the Indians will follow. It is now conceded that as the Indians at this agency go so will go all the tribes on the reservaagency go so will go all the tribes on the reserva-tion, and that success here will secure the opening of the land to settlers. At the last private council of the Indians many

At the last private council of the Indians many were absent. This is taken as an indication of a split in the fribes and the breaking of the dead-lock. Several of the chiefs, including Black Bull and Cottonwood, were among the absent and the rumor is now affoat among the half-breeds

and the rumor is now affoat among the half-breeds and interpreters that they held a separate council and decided to favor the treaty. This has not been confirmed, but sufficient is being whispered to warrant the hope of at least a partial success. The law requires that the consent of three-fourths of the Indians shall be obtained, and this fact, together with the strong opposition of the most influential chiefs, is not encouraging. If the unit rule is broken a lively scene among the Indians may be expected, for those who lead the opposition to the treaty are bitter and resolute.

A St. Louis Girl Missing.

A St. Lohis Girl Missing.

Br. Louis, Aug. 5.—The police are looking for Ada Higbee, 18 years old, who left home last Saturday, telling her mother that she would never see her again. She became engaged in North Vernon, Ind., where her father was then living in good circumstances, to a man who afterward turned out to be married. Since then she has been subject to fits of melancholy. She has considerable talent as a vocalist and planist and recently filled an engagement as such in a summer theater here under the name of Pearl Scott.

Caught by the Wire.

Mrs. Mary Pedroux of 133 Haron street alighted from a cable train at the corner of Clark and Su-perior streets last night. A piece of wire which was wound about the car-wheel caught her dress, and, as the train moved, dragged her some dis-tance. When picked up, the grip having stopped, it was found that she was quite badly injured.

A Corner-Stone Robbed.

Columbus, Ind., Aug. 5.—It has just been discovered that the corner-stone of the German Methodist church of this city has been robbed of its contents by thieves, who cut away the brick above the stone. The church, which was built forty-nine years ago, has been used but httle lately. The thieves secured some gold coin and other valuables. other valuables.
